

Top Drive Service Loops

OEM-Quality Top Drive Service Loops for Land Drilling Operations

Nexans AmerCable service loops are engineered and produced at our state-of-the-art cable and service loop production facilities.

- Potted or non-potted
- 300V – 15kV AC
- DC Power
- Instrumentation
- Composite Power & Control
- Thermocouple
- Fiber Optic
- Electro-Optic
- Available with or without quick disconnects

Nexans AmerCable offers a standard line of top drive service loop packages, including:

NOV (VARCO)

TDS – 11

TDS – 9

TDS – 10

TDS – 3

TDS – 8

IDS

PS2

(Conversion Kit
from loose cables
to hanging loop)

Custom Loop Designs

Nexans AmerCable offers custom engineered service loop solutions that deliver higher levels of safety and productivity.

NOV, VARCO, TDX, TDS, and IDS are trademarks owned by National Oilwell Varco, LP or its related entities. Nexans AmerCable is not affiliated with National Oilwell Varco or its related entities.

TESCO and its associated trademarks are trademarks owned by Tesco Corporation or its related entities. Nexans AmerCable is not affiliated with Tesco Corporation or its related entities.

CANRIG and its associated trademarks are trademarks owned by Canrig Drilling Technology Inc. or its related entities. Nexans AmerCable is not affiliated with Canrig Drilling Technology Inc. or its related entities.

Nexans AmerCable maintains ready-to-ship inventory in weatherproofed containers.

Nexans AmerCable has been producing top drive service loops since 1993. Our professionally engineered service loops are built to withstand the hazardous operating conditions and dynamic stress of land drilling operations.

With Nexans AmerCable you can expect:

- Short lead times
- Reliable on-time delivery
- Outstanding engineering and technical support
- Great customer service

Core bundles, which are specifically designed for service loops, are expertly produced at our 500,000 sq. ft. El Dorado, Arkansas cable manufacturing facility.

Service loops are completed at our 80,000 sq. ft. manufacturing facility in Houston, Texas. Bundles are inserted in hoses and fully potted (non-potted also available). Our highly experienced technicians add couplers/connectors as specified, then each loop is computer tested and packaged in weatherproof containers.

Nexans AmerCable is a leading producer of power, control and instrumentation cables designed for the harsh operating environment at land drilling rigs.

Cables are available in a variety of constructions, including:

- Standard Gexol® cables
- Low smoke halogen-free
- CIR® – Crush & Impact Resistant (without external armoring)
- CIR® Arctic Grade – for extreme cold operating conditions
- VFD cables - five constructions
- GexSIS-125 switchboard wire
- DLO

*AmerCable also offers
engineered cable assemblies
that save you time and money.*
